

FLEXIBLE PACKAGING SOLUTIONS

PET FOOD

TricorBraun Flex understands the needs of packaging pet food and treats. We offer stock and custom printed laminated packaging for dry pet food, nutritional supplements and pet treats.

Our stock line carries pet food packaging ranging from 2 oz - 40 lbs, and ship from our warehouse within 24-48 hours of order placement. In addition, we produce hundreds of custom pet food packaging projects a year. We have several custom printing options and offer the latest in formats and features.

If you have questions or would like to see samples, please don't hesitate to call 1-800-562-2247 or e-mail us at bags@pacificbag.com.

PALLETIZATION WITH ANTI-SKID & AIR RELEASE SYSTEMS

ANTI-SKID: Large laminate pet food bags can be difficult to palletize. We offer multiple grades of Anti-Skid (Hi-COF) Coatings and Low-Slip Materials that allow large pet food bags to be palletized.

AIR RELEASE SYSTEMS: Trapped air inside a bag can cause a pallet to become unstable after stacking. This can cause the pallet to tip over in transit resulting in lost product and revenue.

MICRO-PERFORATIONS

A series of tiny holes strategically placed on the bag allows trapped air to escape the bag during the palletization process.

DEGASSING VALVES

We have several types of valves from Hi-Flow Inner Valves to Outer Label/Wipe-On Valves, as well as Two-Way Valves. The valve has a filter paper covering the valve to provide protection against dust and infestation.
